Whitney TuffSkin™ Premium Tooling

From The Leader in Plate Technology

TuffSkin Premium Tooling gives you extended wear and withstands high compressive stresses – again and again!

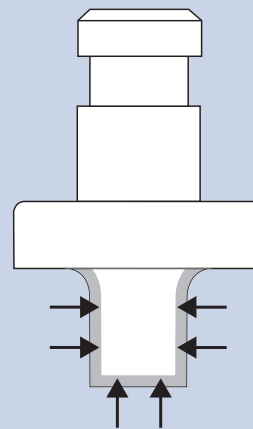

- Punch up to three or more times the holes than with a standard tool in normal applications; up to ten times in the tough applications.
- Punch holes smaller than material thickness – even in high strength steels.
- Extend the life of shave punches – for vertical holes in thick materials with minimum breakout.
- TuffSkin's heat resistance greatly reduces wear from heavy punching applications such as perforating.
- Prevent galling – punch surface stays clean.
- 36TC and 44TC styles available.

"TuffSkin tooling generated three times more hits than the standard tooling...nearly four times after being resharpened!"

—Karen Taylor, Vice President, Seguin Fabricators, Ltd.

Use TuffSkin Premium Tooling to:

- Reduce tooling costs. The longer life of the punches dramatically drives down the cost per hole, reducing overall production costs.
- Dramatically improve life in harsh conditions such as shaving, perforating, and punching holes less than material thickness.
- Ensure tool integrity while your machine runs unattended.
- Reduce costs of inspecting and resharpening punches.

An advanced chemical process combines with the extra strength base material to form an abrasion resistant surface that does not flake off.

"We benefit from the production time saved with TuffSkin's extended life for our high use punches. We save time in changing and sharpening tooling, and even in purchasing, receiving and shipping costs with reduced purchase orders."

—Tim Krueger, Manufacturing Supervisor, Arrowhead Conveyor
